PERSONAL SETUP & EDUCATION

Education, not just an indicator.

- 30-minute free 1-to-1 video call
- BTC, crypto, trading & investment mindset
- TradingView walkthrough on your account
- How the indicator's rules work and how to use them
- No TradingView subscription? Alternative alerts covered

Personal support is educational and technical, not financial advice.

PATIENCE IS PART OF THE STRATEGY

Three rules that keep the account alive.

01 NO VALID SETUP = NO TRADE

The rule set decides, not the mood of the market or the noise on your timeline.

02 NEVER CHASE A MOVE IN PROGRESS

If the entry is gone, it's gone. You wait for the next confirmed signal.

03 THERE IS NO MISSED OPPORTUNITY

There will always be another setup. Missed trades are data, not loss.

MEET THE FOUNDER

Michel Welter

Founder, Alpha Long RBN

Like many people, I tested strategies, followed influencers, lost money, learned and started again. Markets are tough.

After that rollercoaster, we built and repeatedly backtested Alpha Long RBN. We are not selling utopia. The approach is based on patience, consistency and perseverance.

We know this is your hard-earned money. That is why we are transparent: this is a commercial product, and the only way it grows is if the rules keep working for the people who use them.

DISCIPLINE BEATS PREDICTION.

Wait for confirmation, respect the plan, and let the next opportunity come to you.
